

ILS G11 teaching lectern

ILS G11 is a compact, sleek 14U rack cabinet interactive lectern platform with adequate choice of monitors (20-24") and space for multiple PC's, switching and audio gear.

System is build almost entirely from durable aluminium that can easily be upgraded and last for decades. This lectern is designed for classrooms and conference rooms. The broad application of this novel lectern is enhanced in the fact that the general purpose VESA mount is tilt adjustable to suit both multi-touch and pen-interactive monitors.

The lectern has 4 double wheel rollers that move side-ways for maximum stability and movement in the practical direction.
