ILS prides itself to build the highest quality lecterns around from thick aluminum profiles, blocks and plates, machined to a perfect fit and style. The lecterns are virtually free of maintenance for decades. In ILS products it is possible to remove a damaged part and renew it, or to make new fittings for future upgrades without affecting the rest of the installed system.

ILS Synergy SW delivers ILS quality with a smart design. The solid, top of the lectern is placed on a motorized wide pillar with a height adjustment range up to 40 cm (15 "+). Two buttons will help you to control it. In the lowest position, a seated person can freely use the system.

The Synergy SW is the ideal smart solution for PC presentation. A holder for the micro PC is installed inside the working surface, and the integrated VESA mount allows the installation of a monitor up to 27". This lectern also provides two horizontal side tables moving up or down with the top. This makes it possible to use handwritten notes, laptop, or place a document camera on it. The built-in switcher or four sockets with the type on request will be great helpers when handling connections between the main screen of the lectern and/or laptop, or other devices. To do this, there are four buttons on the top panel of the product. There are also two USB 3.0 sockets and a holder with built-in charging cables for tablets and smartphones. The microphone socket is of the XLR shock-mount type.

For mobility and rock-solid stability of the lectern during the presentation, 4 side-ways rollers are embedded in the bottom plate. In addition, we will be pleased to engrave your logo on the front panel of the lectern, in case of using the system in formal events!
