ILS
premier source for intelligent lecterns

lecterns for meetings & conferences

Stand out from the crowd with an ILS lectern using sho-Q!

ILS offers a wonderful integration of touch monitor or all-in-one touch PC on a height adjustable pillar. All cabling is fed though the pilar for a very clean unobtrusive look. Due to the height adjustment options this lectern can be used seated as well as standing.

Side tables provide a horizontal platform for a glass of water, a computer mouse or documents, larger side tables are available to accommodate a laptop.

ILS22

22" touch glass surface monitor with integrated PC. Extensive controls via the extra built-in processor for the entire venue over IP, serial and relays.

With sho-Q you can automatically load your presentation in a few seconds from a USB thumbdrive or from the corporate presentations drive on the network.

Use sho-Q to automatically line up a dozen presentations for an event in advance. You can switch seamlessly from speaker to speaker, and jump to any slide in any presentation within seconds!
Use sho-Q to interact with your slides using a finger or pen on the touch screen.
Insert a blank slide or annotate an existing slide using the built-in whiteboard functions.

ILS27

27" Lenovo multi-touch monitor with integrated PC.
2x XLR, USB hub, HDMI switcher.
Aluminum floorplate, lockable casters.

ILS lecterns in use in a boardroom in Moscow, and the Delegate Hall in Brussels
