

ILS12X Presenter workstation

The ILS12X combines your choice interactive monitor with a lectern/workstation base for an all-in-one presenting solution that makes you stand out! You can present to your audience with confidence, control your slides and see your notes with a single touch, and annotate to get your viewpoints and lessons across to your audience with ease.

Your monitor is turned into a full-fledged lectern or presentation system in cooperation with Intelligent Lectern Systems. The workstation features electronic height adjustment that meets ADA standards. Whether you are seated or stand as tall as the average basketball player, you will find a comfortable and effective position to present from.

Choose any VESA-mountable display such as from Wacom, SMART and ELOtouch or any other you prefer to work with. The screen can be adjusted to 3 different tilt angles to suit the lighting in the room, or to match user preference.

You can insert certain ultra small form factor PC types into the lectern's foot, or you can order the standard industrial PC package that is pre-configured for your needs and ready to use. The floor module will house the optional PC with dual VGA and HDMI support, and has a lock and key for switching the system on/off. The base comes with 2 rollers and 2 fixed feet so that the lectern can easily be moved.

On each side of the monitor there are two side tables to hold documents, a mouse, or a glass of water.

The ILS12X comes with a license for sho-Q, the presentation delivery system for multiple PowerPoint presentations to present better, with more impact, and more confidence.

For information on sho-Q consult our web pages http://www.intelligentlecterns.com/ils_main/software.html

The ILS12X is targeted to education and presentation as well as a process control console:

- **More dynamic presentations**

The ILS12X allows you to create your all-in-one presentation solution. With Sho-Q, which comes preinstalled if you order with the optional PC package, presenters can control their presentations with a single touch which makes the presentation flow very smoothly. The presenter has easy access to their notes – these will only be visible on the presenters screen, not on the screen the audience is watching – and can choose to hide the notes with a single touch to prevent getting distracted. Sho-Q adds more support and control over embedded multimedia files, and annotations that are written on the interactive monitor screen will be instantly visible in Live mode.

- **Increased interactivity for use in education**

The ILS12X also offers universities, schools and other institutions new cost-effective possibilities for teaching. Handwritten notes, sketches, drawings and mind maps can be created spontaneously during a lecture or session, and ideas from students can directly be added to the slides. With Sho-Q it is very easy to switch from one lecture or session to the next. The lectures can be added beforehand, ready to start with a single touch, or the lecturer can bring his or her presentation on a USB stick. When the USB stick is inserted into the lectern, the presentation will be added to Sho-Q and it can be started with a single touch.

- **High precision for process management**

Working directly on the screen with a pen or finger enables an increased degree of control and accuracy. An interactive monitor combined with the ILS12X is therefore ideal for process management tasks, e.g. in digital sound mixing.

Functions:

- All-in-one presenting solution in a stylish lectern
- Control presentations with a single touch
- Live annotations
- Height adjustment of the lectern in compliance with ADA rules
- Perfect hand-eye coordination
- Faster and precise cursor navigation
- Simply installs your interactive monitor
- Choice inclinations at 12°, 18° or 24°
- Pressure-sensitive pen tip with 512 pressure levels
- Pre-wired for VGA and USB
- Sho-Q Presenter and Planning suite with optional PC support any Windows environment (XP/VISTA/WIN7)

Specifications:

General:

- Physical dimensions (W x D x H) (90 -120) x 56 x (110 - 135) cm, including stand
- Weight 62 kg, including stand
- 3 angle tilt screen
- In-pillar cable management
- Tray for mini-PC in foot
- 2 wheels on one side

Display:

- Choose your own VESA mountable display

Pillar:

- Extends from 66 cm to 101 cm (total height from 83 to 126 cm on presenter side)
- Height control by moment switch on head
- Mounts at a 12° angle

Display support head:

- Space for display power supply
- Cable manager
- 3 position tilt fixation for the display on its foot (12°, 18°, 24°)
- Up-down moment switch
- 100 x 100 and 75 x 75 VESA mounting holes

Side tables:

- 20 mm steel arms each side of pillar shaped base
- 2 Steel tables each 22 x 33 cm with holes to mount "landscape or portrait"
- Tables mount at 2 different distances to accommodate different monitor sizes

Foot:

- Heavy duty steel foot, plated with steel
- Key to lock out electric power
- PC - and cable management tray
- 2 wheels on the left, 2 feet on the right

Optional PC package

- Industrial engine mini-PC
- 2x VGA + 1x HDMI graphics output
- Intel Core2Due T7500, 2.2GHz, 965GM 160GB HDD, 2GB RAM
- Choice Windows XP Pro / Vista / Win7 preinstalled
- MS Office 2007 Small Business OEM preinstalled (requires MLK license)

Package contents

- BOX 1
 - Pillar with cables pre-installed in cable manager
 - Side table system
- BOX 2
 - Floor module
 - Head module
 - Installation instructions
 - Sho-Q license voucher and instructions for installation
- BOX3
 - Optional PC package

System requirements:

- Microsoft Windows 7, Vista, Vista x64, XP or XP x64 with Aero enabled
- Any graphics card with DVI or VGA
- sho-Q Presenter:
 - PC with dual graphics output in extended desktop mode
 - Microsoft Office 2007 or 2003
